Summary

Hands-on builder and AI Lead who architects and ships intelligent systems from scratch. Takes full ownership of the AI stack, from designing scalable LLM agents and RAG pipelines in Python to deploying production-ready systems. Driven to establish technical vision and execute from zero to one.

Projects

- **No-Code RAG AI Builder** *(private repository in development)*
  - Architected scalable platform to deploy RAG agents from scratch
  - Engineered full AI stack with LangChain, vector databases, observable architecture
  - **Tech: Python, LangChain, ChromaDB, FastAPI, AWS**
  - Code will be displayed in an interview setting

- **Sizzle** – *Independent Music Streaming Platform*
  - Developed a secure, full-stack MERN application featuring role-based authentication, real-time updates, and data visualization
  - Built a performant backend with Node.js and MongoDB and integrated multiple external APIs with a custom audio player.
  - ***Tech: React, TypeScript, Node.js, MongoDB***
  - Code | Demo (Deployed via **Netlify**)

- **Pro App** – Full-Stack Task and Project Management Application
  - Led end-to-end development of streaming app with Node.js/MongoDB backend
  - **Tech: React, TypeScript, Node.js, MongoDB**
  - Code Demo Admin login: mrcoffee@gmail.com | Password: secretPass30#

Work Experience

- **Billing Analyst at OPC Energy (Jun. 2024 – present) -** Led cross-functional data automation initiatives using analytical tools, streamlining processes and improving data accuracy

- **Feb. 2024 - Apr. 2024 Full stack Internship at Makes - PeaceTech company**
  - Contributed to a collaborative product team, developing features for a music platform and supporting API workflow integrations

- **Jun.2022 - Jul.2023 – Economist at GBP Tech Solutions LTD (Fintech)**
  - Delivered data-driven financial analytics, working with CRM systems and client data tools to inform business decisions

Education

- **2025 - IBM AI Certificates-**
  - Generative AI & LLMs, LangChain & RAG, Language Modeling with Transformers, Deep Learning, Machine Learning
- **Sep. 2023 – Apr. 2024 Full Stack Developer Bootcamp – Appleseeds.**
  - 720+ hours, project-based training in React, Node.js, MongoDB
- **2015-2018 - B.A. In Economics & Management Tel-Hai academic college**

Professional Skills

- **AI & GenAI:** LangChain, RAG Pipelines, LLMs (OpenAI), Vector Databases (ChromaDB, Pinecone), AI Agents
- **Languages:** Python, JavaScript, TypeScript
- **Backend & APIs:** Node.js, Express, FastAPI, RESTful APIs, MongoDB
- **Infrastructure & Tools:** AWS, Docker, Git, CI/CD, Observability, Serverless Architecture
- **Methodologies:** Agile Development, Zero-to-One Product Development, System Architecture
- **Languages:** Hebrew – mother tongue l English – fluent l Russian- proficient
